- 13.3. Once the Rescue Level is reached, all open trades on the Follower Account are closed and the remaining funds are no longer available to be placed on trades.

Example A:

Follower deposits 1,000 USD and selects Rescue Level of 20%, therefore 200 USD is secured in case of loss, subject to Clause 13.4. When Follower's equity reaches 200 USD all open trades are closed and the remaining funds are no longer available to be placed on trades.

Example B:

Follower deposits 1,000 USD and selects Rescue Level of 25%, therefore 250 USD is secured

in case of loss, subject to Clause 13.4. Follower makes profit of 250 USD and decides to withdraw 500 USD. Upon withdrawal, the Follower is requested to set new Rescue Level which will be calculated for the remaining funds of 750 USD.

Example C:

Follower deposits 1,000 USD and selects Rescue Level of 30%, therefore 300 USD is secured in case of loss, subject to Clause 13.4. Follower decides to make an additional deposit of 100 USD. Upon deposit, the Follower is requested to set new Rescue Level, which will be calculated for funds of 1,100 USD.

13.4. The Follower hereby acknowledges and understands that due to high volatility, Rescue Level can be triggered below or above the expected amount. It is understood that the Company shall not be held liable for the difference between the expected rescue amount and the actual rescued amount in case of volatile market conditions.

13.5. Followers can only readjust the Rescue Level during redeposits or withdrawals.

14. Copy Ratio

14.1. Copy Ratio is the ratio determining the size of the Followers position copied in relation to the Strategy Provider trade. It is calculated as Equity Ratio between Follower and Strategy Provider and the chosen Follower Volume Allocation.

14.2. The Copy Ratio changes dynamically as the equity on the Follower Account and Strategy Provider Account changes, meaning it is recalculated on each trade as the equity ratio is different on each trade even if the Volume Allocation has not changed.

14.3. Follower Volume Allocation is the Percentage selected by the Follower which, alongside his equity, is used to determine the volume of trades to be copied.

14.4. Volume Allocation can be adjusted during each deposit to the Follower Account meaning the Copy Ratio is reset each time funds are added to the Follower Account.

14.5. In the event that the position size to be opened - based on the Copy Ratio - is less than the minimum tradeable volume offered by the Company, then the trade will open with a minimum contract size. This is subject to your approval and confirmation otherwise the

trade will not be copied.

- 14.6. In the event that the position size to be opened – based on the Copy Ratio – is more than the maximum tradeable volume offered by the Company, then the trade will open with the maximum trade size of the account type. This is subject to your approval and confirmation otherwise the trade will not be copied.
- 14.7. The corresponding position size of the copied trade to be opened in the Follower Account after the calculation of the Copy Ratio will be rounded up or down, to the nearest hundredth. For example, if the copied trade to be opened based on the volume allocation is 0.124, the position will be rounded down to 0.12 and if the copied trade to be opened based on the volume allocation is 0.127, the position will be rounded up to 0.13.
- 14.8. In the event of a partial closure of a position by the Strategy Provider the corresponding partial closure position size to be closed in the Follower Account after calculation of the Copy Ratio will be rounded up i.e. if the partial closure of the copied trade based on the Volume Allocation is 0.005 the partial closure position size will be rounded up to the minimum volume size.

Copy Ratio Example A:

Follower A deposits 400 USD and selects Volume Allocation of 100%

Strategy Provider A deposits 5,000 USD

The Follower's trade copy ratio will be $400/5,000 \times 100/100 = 0.08$

Strategy Provider A opens position size of 0.50 lot

Follower A position size will be $0.50 \times 0.08 = 0.04$ lot

Copy Ratio Example B:

Follower B deposits 400 USD and selects Volume Allocation of 50%

Strategy Provider B deposits 5,000 USD

The Follower's trade copy ratio will be $400/5,000 \times 50/100 = 0.04$

Strategy Provider B opens position size of 0.10 lot

Follower B position size will be $0.10 \times 0.04 = 0.004$ lot, therefore the trade will open with

minimum trade size of 0.01 lot subject to the Followers approval and confirmation, otherwise the trade will not be copied.

Copy Ratio Example C:

Follower C deposits 10,000 USD and selects Volume Allocation of 100%

Strategy Provider C deposits 5,000 USD

The Follower's trade copy ratio will be $10,000/5,000 \times 100/100 = 2$

Strategy Provider C opens position size of 1.00 lot

Follower C position size will be $1.00 \times 2 = 2.00$ lots

15. Performance Fee

15.1. Strategy Providers will select at the time of opening their Strategy Provider Account a Performance Fee percentage up to a maximum of 50% (Fifty percent).

15.2. Followers are obligated to pay the Performance Fee to the Strategy Provider they choose to follow based on their positive performance i.e. the Strategy Provider shall not receive the Performance Fee in case of a negative performance.

15.3. The Performance Fee is calculated according to the below formula:

(Follower's Profits – Follower's Losses) * Strategy Provider chosen Performance Fee % = Performance fee payable by Follower to the Strategy Provider

Example A:

Strategy Provider A chosen Performance Fee is 20%

Follower A profit = 1,000 USD

Follower A loss = 0 USD

*$(1,000 - 0) * 20\% = 200$ USD payable by the Follower to the Strategy Provider*

Example B:

Strategy Provider B chosen Performance Fee is 25%

Follower B profit = 1,000 USD

Follower B loss = 500 USD

*$(1,000 - 500) * 25\% = 125$ USD payable by the Follower to the Strategy Provider*

Example C:

Strategy Provider C chosen Performance Fee is 30%

Follower C profit = 1,000 USD

Follower C loss = 1,200 USD

*$(1,000 - 1,200) * 30\% = -60$ USD, therefore No fee payable by the Follower to the Strategy Provider for negative performance*

- 15.4. The Strategy Provider acknowledges, understands and confirms that the formula is based on the investment duration and therefore covers the period starting from the last Performance Fee pay-out to the current date. The Performance Fee is not guaranteed as the value of open positions rise or fall.
- 15.5. The Strategy Provider shall have the option to choose whether to receive the Performance fee daily, every Saturday or upon withdrawal or unfollowing. However, the Strategy Provider to be eligible to receive the performance fee daily, there is a minimum amount that must be generated per follower to be paid.
- 15.6. Performance Fee calculation, deposit and withdrawal of funds, crediting and debiting of Performance Fees are performed automatically by the Company and will be shown on Copy Trading statements accordingly.
- 15.7. Strategy Providers acknowledge, agree and understand that the Company, without prior notice to the Strategy Provider, reserves the right at its sole and absolute discretion, to void and/or forfeit any performance fees which have been paid and/or are due to be paid to the Strategy Provider's Account, in the case the Strategy Provider has not logged into his Account for a period of twenty-four (24) months.

- 16.1. The Company has the right to archive any account either a Strategy Provider or a Follower Account as per the terms of the Account Opening Agreement which the Strategy Provider
